It will be the responsibility of the Providers Office or Requesting Provider to notify the Medical Staff Office if this applicant is no longer employed, affiliated with your organization or no longer requires access.

Catholic Health

Computer Applications Available from CH for Remote Access for Medical Professionals

In order to obtain remote access to any of the Catholic Health computer programs, the provider must complete a Provider Staff Remote Access Request Form. Please complete the requested document and return it to the Medical Staff Office of your primary CH facility. A brief description of each of the programs is listed below to assist you in deciding which programs you may need access to.

Applications Definitions:

Active Directory (AD) Logon
To log into a computer at Catholic Health, you need to have an account, your AD Login account. This account is also linked to other systems, including **Internet access**, and **DUO** Remote access (VPN access). This does need to be requested as it is a prerequisites for remote access.

Soarian Clinicals
Soarian Clinicals is the current repository hospital data. This includes lab and radiology results, transcriptions, documentation, Provider order entry (CPOE), Medication Reconciliation, and ePrescribe.

Soarian EDM
EDM (Electronic Document Management) contains the patient's legal medical record. Providers correct, and/or sign off on dictated reports in Soarian EDM. (AD Logon)

Soarian ePrescribing
Access within Soarian Clinicals that allows ePrescribing.

Dragon
License base program that integrates with Catholic Health EMR software for talk-to-type transcription. (AD Logon)

Tiger Text
Mobile phone based secure messaging/texting for specifically for communications that contain PHI. (AD Logon with/+ @chsbuffalo.org) A CHS Mailbox is not required.

Epiphany Cardio Server
EKGs are generated in Epiphany, and made available in Soarian Clinicals. Only "Reading" Doctors and EKG techs need direct access into EKG Cardio Server. All others should view EKGs in Soarian.

Point Click Care
Point Click Care is the current EMR used by the Long Term Care sites within the Catholic Health System.

Syngo Plaza (PACS)
Radiologists use Syngo Plaza to read scans and do reports*. Access is limited to radiologists only.* All others have access to images through Soarian Clinicals.

iConnect (PACS
PACS viewer for Mount St. Mary's.

Resolution MD (ResMD)
ResMD is the program that allows all other non-radiologists to view imagery at Catholic Health. An account will give you the ability to pull up imagery for patients and do comparison studies. If you do not need to pull up old (greater than 6 weeks) images or do comparisons, you are able to access images through Soarian Clinicals. ResMD is the replacement for Magicweb. (AD Logon)

Meditech (Mount St. Mary's)
Primary EMR for Mount Saint Mary's.

Imprivata Provider Access (Tap & Go)
Single Sign On (SSO) for Mount Saint Mary's with use of ID badge based off of AD Logon. Only Physicians and mid-level providers should request this access.

Digisonics (Fetal Ultrasound)
Fetal ultrasound system for Mercy Hospital and Sister's Hospital.

MedHost
Medhost is the application used in the ER at all four Acutes and the MACC. In order to access the documentation done in the ER, you will need an account for that site. ED physicians should request access for all sites. Non-ED physicians should indicate which site you will need access to. Please note that all ancillary results done in the ER will appear in the patient's record in Soarian Clinicals.

MedHost ePrescribing
Access to ePrescribe within the MedHost Application. Only for ED physicians, request access to all sites.

eClincal Works
License based EMR used in Catholic Health Primary Care site. Only for credentialed Providers practicing for a Catholic Health based Primary Care Center.

eClincal Works ePrescribing
Access to ePrescribe within the eClinical Works application for Catholic Health Primary Care Sites only

Syngo Dynamics
Syngo Dynamics access is for Cardiologists only - to view, read, and report on ECHO/Ultrasound images and studies. All other providers have access to these images and reports through Soarian Clinicals.

Picis OR Manager
This application is used for surgery scheduling. Remote users who request access to this application also need to request VDI – Virtual desktop – WebVPN Access and VDI – Virtual Desktop – CHClinicalVDI.

DUO
Remote Access Platform that has replaced Anakam. Utilizes phone, SMS Text, and mobile device Apps for duel factor authentication. Required for remote access to the CHS VPN

EPIC EMR

EPIC Scheduler

Other
Catholic Health has over 375 applications.
