

**TO:** Physicians and Advanced Practice Providers

**FROM:** Dr. Michael Galang, SVP & Chief Information Officer

**DATE:** May 6, 2020

**RE:** Epic eLearnings

---

Catholic Health partnered with Epic Systems for a new Electronic Health Record (EHR) in an effort to improve patient safety and become a more efficient healthcare system. We remain committed to go-live across all participating ministries on November 1, 2020.

After an extensive evaluation and considering all possibilities while confronting the COVID-19 pandemic, Catholic Health decided all Epic training will be completed in virtual environments. We believe computer-based learning offers the best available option to complete a successful implementation within our timeframe.

Physicians and advanced practice providers can get a head start by visiting HealthStream and reviewing eLearnings demonstrations that will be required during the training process. You will have the ability to search for demonstrations designed for your specialty.

These video presentations were created from Epic Foundation practices and therefore have not been customized for Catholic Health or personalized for individual users. However, eLearnings will offer insight into the look and feel of the technology in advance of training that we believe will benefit the training process and lead to a smooth transition.

Please see the attached step-by-step instructions for logging into HealthStream and gaining access to the materials we have provided. If you have any questions pertaining to the HealthStream log-in process, feel free to call the Help Desk at 716-828-3600.

Thank you,

Mike Galang
