

Epic Provider Power User Training Schedule

What is a Power User?

A Power User is a clinician who uses Epic tools at the optimal level. Some Power Users are motivated to learn more about how Epic works in order to become more efficient. Others might have a role in coaching and helping colleagues in their department or organization become more efficient.

MD201: Introduction to Power User

Power User Introduction

The Power User training program kicks off with an overview of the program. You'll explore tools your organization can use to measure your use of Epic and learn tips you can put into practice immediately. The course is intended for physicians, physician assistants, and nurse practitioners who have already attended workflow based training at their organizations.
