

Efficiency Hours are designed to help physicians and APPs be more effective and efficient using Epic to take great care of their patients. The tips and tricks we review are focused on tools that should be available to any physician using Epic, and the sessions are free to attend. We are currently offering **four topics focused on outpatient workflows** and **TWO inpatient workflow focused topics**. In addition, we are offering one additional NEW session: “Just the FAQs, doctor” (**THIS topic/hour will NOT have CME** associated and will be focused on top questions we get plus a chance to maybe take some questions live from the audience).

Each regular session will be offered multiple times. Physicians/APPs attending live can earn up to 1.0 AMA PRA Category 1 credit and 0.1 CEUs from UPCEA through the University of Wisconsin. If you aren’t already registered with UW-Madison, you can create your account by going to [ce.icep.wisc.edu](http://ce.icep.wisc.edu). We will send more information out about obtaining CME credits a couple days before the session.

If you’re a physician builder or power user, you’re still welcome to join us even if you are already an expert at efficiently using Epic... but what we really hope you can do is invite your colleagues and help them get signed up! That’s the number one reason why people said they signed up for our January sessions.

**\*\*\*NOTE: All times listed below are US Central Time – THIS MAY BE DIFFERENT THAN YOUR TIME ZONE\*\*\***

When you click a link, it will take you to a Zoom page to register. After you register, you’ll receive a link in your email **AND AN OPTION TO ADD A CALENDAR INVITE**. If you don’t receive the email after you register, check your Spam folder. You can manage your registration from that link as well.
