## March 2024 News/Updates for Inpatient Providers

- NPO Orders Paneled with IV Fluids**

As a recommendation from provider leadership – NPO orders will be paneled with IV fluid options as a reminder to consider ordering IV fluids with the NPO order.

- Proper Patient Lookup**

When searching for a patient, it is crucial to make certain you have selected the correct patient. When the patient look up process is not utilized accurately, you risk creating unnecessary duplicate records or worse, selecting the wrong patient record. There are 3 patient identifiers that are required when searching for patients. It is important to enter as much information as possible to ensure you are selecting the correct patient.

- Capturing Professional Charges in the Hospital Environment**

As a reminder, Providers seeing patients in the hospital setting should be dropping charges for consults, subsequent visits, and surgeries, including PA surgery assists. See instructions below for correct workflows

- Dragon Medical One Essentials training**

Join a small group, virtual fundamentals training, pertinent to your role to get the help you need with Dragon Medical One. Find a description of the different training style groups available - in the poster found on your Learning Home Dashboard – and self-register.

- Physician SmartUser**

Improve your Epic skills and earn CME with the Epic Physician SmartUser classes. These classes are available for Physicians and Advanced Practice Providers.

Schedules and self-registration available at <https://efficiency.epic.com>

Detailed information for all the above can be found on your Learning Home Dashboard  
~ in the “What’s New for Inpatient” section
