## April 2024 News/Updates for Inpatient Providers

- **MAR Hold Unhold**

Providers have the option of placing a medication on general hold or holding for a specific time interval or a single dose.

- **Policy Edit ~ Hypoglycemia**

We have edited our Hypoglycemia policy ~ removing the section on bedtime / overnight hypoglycemia.

- **Insulin tipsheet 2024**

Check the recent tipsheet from Pharmacy with guidelines on insulin administration for critically ill and/or non-critically ill patients.

- **Correction Insulin Admin and Meal Documentation Report**

An issue with accurate documentation of POC Glucose and Meal Intake documentation has been identified and reported by the Glycemic Control Committee. A report has been created for each facility.

- **Epic Upgrade coming May**

The next upgrade to Epic is scheduled for May 15 – watch for upgrade slides and information to be posted on your Learning Home.

Detailed information for all the above can be found on your Learning Home Dashboard  
~ in the “What’s New for Inpatient” section
