## August 2024 News/Updates for Inpatient Providers

- **User Settings Dashboard**

Did you know there is a User Settings Dashboard where you can track your customization progress? You can see which personalization settings you have used and what's available.

- **Interpreter Services**

When speaking with a patient who requires an interpreter, the patient's chart and notes should be updated. You can indicate interpreter services were used on the patient's storyboard, in any notes, and in blood admin, surgical and procedural consents.

- **Holds – Duration Based Medications**

To help prevent inappropriate administration of held medications, we've changed the way provider holds work for duration-based medications with a frequency other than Continuous, such as patches and IV piggybacks.

- **Discontinuing Home Medications**

When discontinuing a home medication, you will now see a prompt for a reason for the discontinue.

- **Epic SmartUser Classes**

Free Epic efficiency classes with CME for any CHS provider! Learn efficiency tips for being your best in Epic. Class schedules are available at <https://epic.efficiency.com>

Detailed information for all the above can be found on your Learning Home Dashboard  
~ in the "What's New for Inpatient" section
