

**TO:** CHS Medical & Nursing Staff  
**FROM:** Kenneth Martin, System Director, Laboratory Services Result  
**SUBJECT:** Review Tree  
**DATE:** September 8, 2025

---

Effective, September 22, 2025, the CHS Laboratory and Epic Beaker teams will deploy the finalized modifications to the Result Review Tree in Epic. These updates are designed to improve the organization, classification, and grouping of laboratory results, enhancing the clarity and efficiency of result interpretation. With this deployment, the structure will be stabilized, and results will consistently appear in their designated locations. This change supports better clinical workflows and ensures that providers can more easily locate and interpret laboratory data.

If you experience any issues with result display or have feedback regarding the new layout, please submit a ChangeGear ticket for review. For questions related to ordering or testing of samples, contact the laboratory customer service team at 862-1150, or reach out to your hospital laboratory for assistance.
