Upgrade November 12 – See what's coming

Epic Upgrade coming **November 12** - Learn about key new features available with What's New content focused on the changes that matter most to you, based on your actual system usage patterns.

Choose how and when you learn what's new:

You should see a notification in your home workspace. Click **View** to review What's New. Or, if now's not a good time, choose one of the options at the bottom of the notification. Send to your Mobile device (Haiku must be setup for you to access) or have an email reminder sent to you to review later. If you're in the middle of something, you can also ignore the notification—it goes away if you continue doing other work.

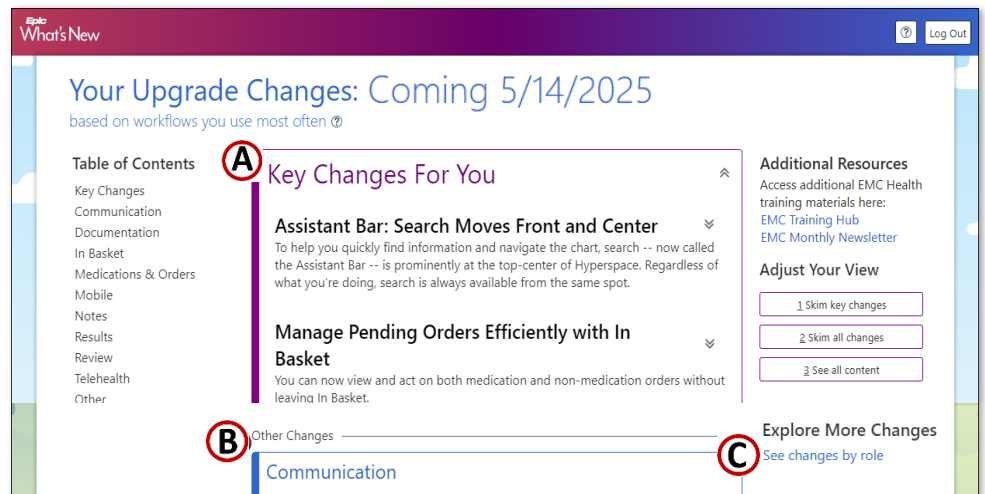

If you want to find the notification again, click the megaphone icon on your home workspace, or search in the assistant bar using a keyword like "what's new" or "upgrade."

Be prepared with key upgrade changes:

What's New is designed to take just a few minutes of your time. Focus on the **Key Changes** section to learn about the features that will make the biggest difference in your upgrade experience **(A)**. Click an entry to get more detail like screenshots, and for more significant changes, tip sheets or videos.

If you want to preview smaller changes you might notice, you can browse by workflow in the **Other Changes** section **(B)**.

You can also explore **changes by role (C)**, for example, maybe you want to see what's new for other roles you work with, or maybe you want to preview tools you don't use yet but might be interested in.
